Apple Tablet Ipad Air 2 Solution ID

[machine model]: Ipad Air 2

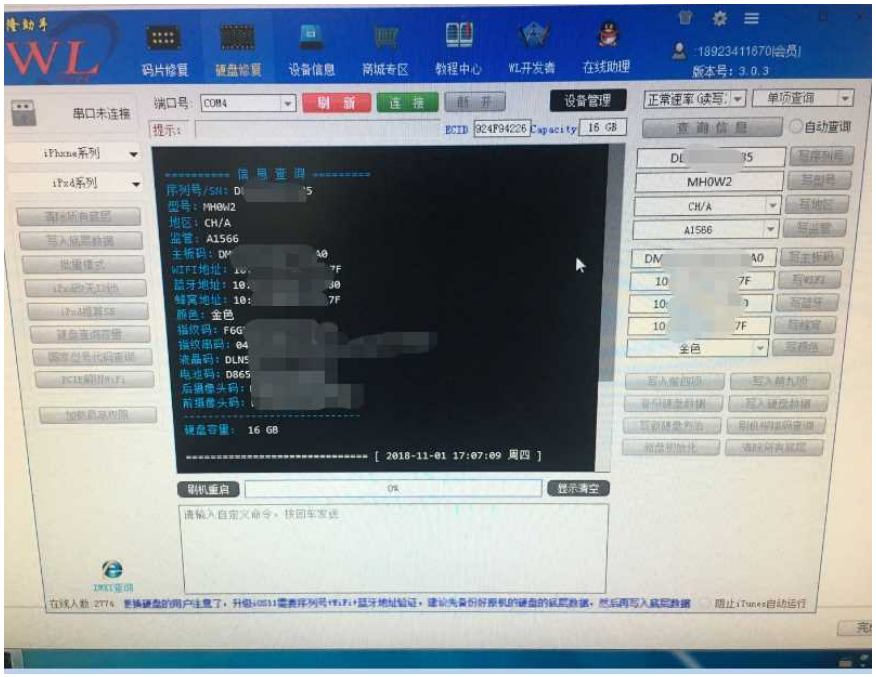
[Fault phenomenon]: Solution id lock

[Maintenance process]: The customer's own tablet id account password is forgotten. After the data is erased, it cannot be activated. The screen backlight is a bit abnormal because the customer has dismantled the screen or disconnected the screen.

Carefully remove the screen assembly

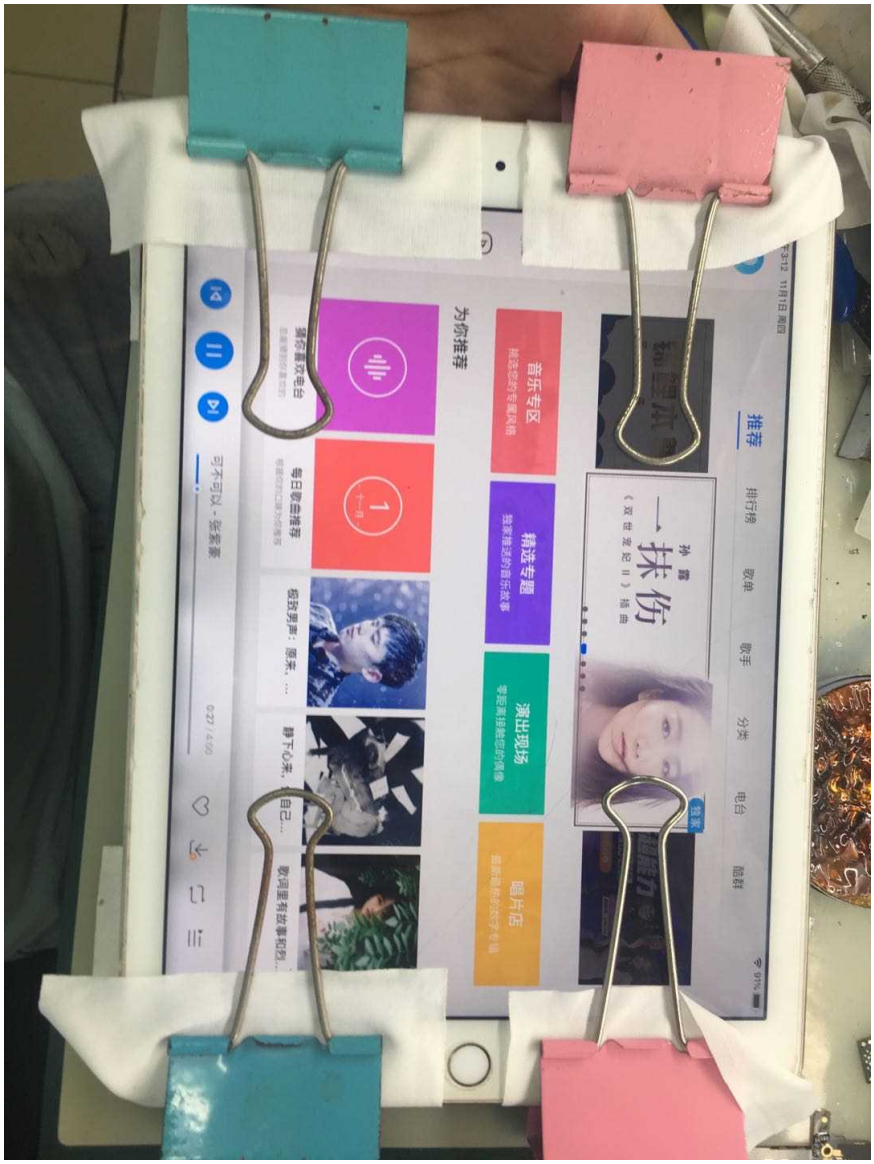
Remove the motherboard, whirlwind gun 350 degrees down NAND, solder pad degumming

Put the NAND into the test rack to change the serial number, WIFI address, and Bluetooth address.



Plant tin is loaded back to NAND, Recovery..

After the Recovery is finished, the test function is all normal, installed, and clamped for a long time to ensure that the screen will not be degummed.



End of repair
