[Faulty model]: ipad Air

[Fault phenomenon]: Unscheduled White Apple restart

The customer described that this tablet is not scheduled to restart White Apple

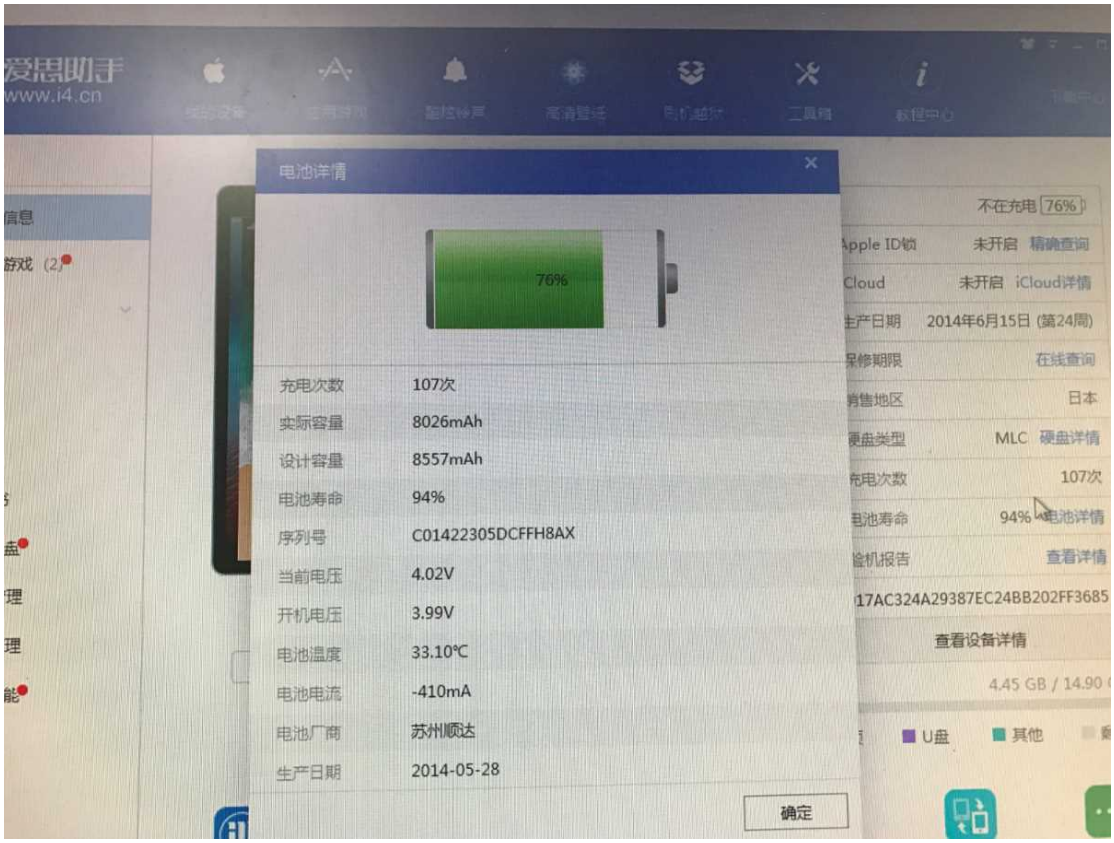
[Fault Analysis]:

Unscheduled White Apple restart, there will be several possibilities, the battery power is not accurate will cause, the system, NAND, etc., to eliminate.

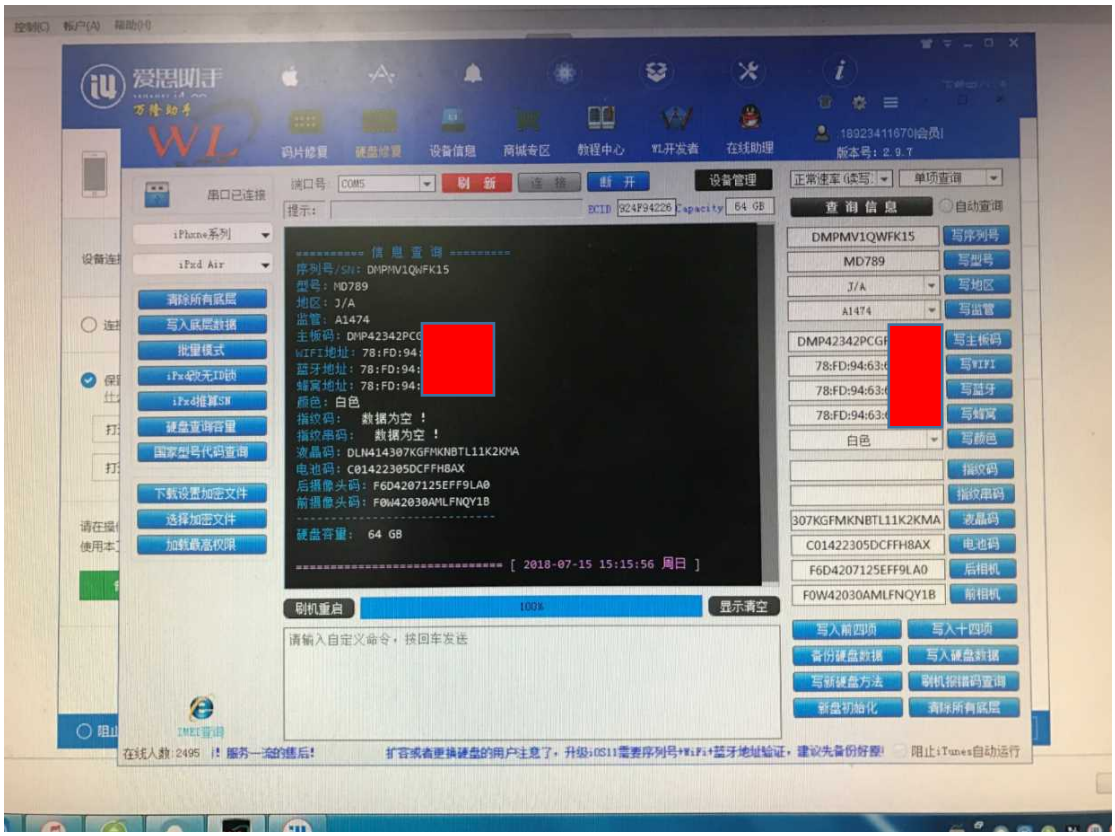
[Maintenance process]:

Consult the customer can Recovery, after Recovery, will still restart from time to time, then check the battery power information is normal, eliminate the possibility caused by the

battery.



Next, take the machine apart, remove the NAND, and replace it with a new NAND.Exclude to see if it is an unscheduled restart caused by NAND.The NAND test rack writes the new NAND data and solders it back to the motherboard.



[Maintenance results]:

The installed Recovery passes, the test function is normal, and the tablet does not restart. This fault is caused by the White Apple's bad White Apple restart.
