Fault model: ipad pro 9.7 inch

Symptom: boot red screen restart

Maintenance process: Received an ipad pro customer description today, boot red screen to find restart, although the ipad pro drawings have not yet, but a ccording to experience ipad appears red screen blu e screen is caused by NAND damage, so directly put NAND down The data found on the NAND test shelf ca nnot be read. Confirm that the NAND is damaged and replace an NAND.

After replacing the NAND, I brushed the machine OK and the fault was eliminated.
